

HOW TO REPLACE GRASS TRIMMER LINE

REMOVING THE OLD ONE

Step 1	Unplug or disconnect the power source.
Step 2	Locate and remove the trimmer head cap. (Refer to your manual for model-specific instructions if needed).
Step 3	Remove the spool and unwind the old line. Discard any line remnants.
Step 4	Clean the spool and head - remove debris or grass clippings.

HOW TO REPLACE GRASS TRIMMER LINE

WINDING THE NEW LINE

Step 1	Check your manual for the correct line diameter and type for your trimmer. Purchase the matching line.
Step 2	Locate the notches or guides and align the new line.
Step 3	Wind the line according to the directional arrows on the spool. Avoid overlaps..
Step 4	Secure the line ends in the spool's guides.

HAPPY LANW CARE!
