

Measure and Compare Lengths

I can measure and compare lengths.

- Choose objects around your classroom.
- You can draw or write the name of your object.
- Measure your object in centimetres or cubes.
- Compare your object with other objects using comparing vocabulary: bigger and smaller.

Object	Measurement	Compare What is it bigger than?	Compare What is it smaller than?
Example 	15cm wide	It is bigger than my pencil case.	It is smaller than the whiteboard.
